

LIQUID ASSETS

Turn production into profit quicker with DRILXPRESS®, a liquid drilling fluid additive that is a superior alternative to conventional Bentonite-based systems.

Logistically Simple

- 1 tote (2,450 lbs) of DRILXPRESS® replaces 12 pallets of Bentonite (48,000 lbs)
- Smaller footprint

Cost Effective

- Reduce shipping costs
- Reduced need for costly treatments
- Quick response to various well conditions

HSE and Environmentally Friendly

- Passes LC 50, Static Sheen, Microtox testing
- No health/safety issues

Easy To Use

- Minimal mixing required
- No hopper required

Enhanced Shale Stabilization

- Inhibits shale hydration for cleaning efficiency
- Lowers clay reactivity
- Eliminates "gumbo" problems

Stable & Effective

- Instant hydration in fresh seawater/most brines
- No "fish eyes"
- Stable up to 300°
- Viscosity and fluid loss where/when you need it

The liquid property of DRILXPRESS® is an efficient and proven solution for controlling drilling.

The liquid polymer formula builds zone protection by enhancing shale stability.

HSE-friendly, DRILXPRESS® requires minimal mixing time and is shipped in pales or totes, saving you shipping costs and deck space.

DRILXPRESS® – Efficiently Profitable.

Improve Production Quickly By Easily Eliminating Problems Before They Occur.

DRILXPRESS® is a liquid drilling fluid additive designed to provide fluid properties that are superior to conventional Bentonite-based systems. DRILXPRESS® inhibits shale hydration resulting in better cleaning efficiency. The additive improves caliper and log quality while producing stronger cementing bonds and ensuring groundwater protection.

A BETTER SOLUTION: DRILXPRESS® replaces inefficient fluid systems. The liquidity of the fluid additive disperses quickly with zero fish eyes. The polymer technology is like no other on the market and can maintain stability up to an amazing 300°. And where traditional powdered additives can take up to 24 hours to hydrate, **DRILXPRESS®** hydrates immediately.

COST EFFECTIVE: The **DRILXPRESS®** system is a liquid base and is packaged in pails and totes. One tote of **DRILXPRESS®** replaces 12 pallets of Bentonite, which means smaller purchasing quantities and reduced shipping costs.

HSE-FRIENDLY: **DRILXPRESS®** has passed HSE testing including LC 50, Static Sheen and Microtox. This product is safe for handling.

Minimal mixing required

No hydrating time

Stable up to 300°

Better viscosity & fluid loss characteristics

Excellent shale and clay inhibition

Easy to ship and store

A SUPERIOR FAMILY OF PRODUCTS

We have been developing superior fluid additives engineered with polymer technology for over 28 years. Our family of products includes:

DRILXPRESS®

- DRILXPRESS® HT
- DRILXPRESS® LC
- DRILXPRESS® IG

ULTRA-SEAL®

- POLY-PLUG®
- POLY-PLUG® CLEAR GEL
- POLY-PLUG® ULTRA SQUEEZE
- ULTRA SEAL® XLA
- ULTRA SEAL® XLD
- ULTRA SEAL® XLR
- ULTRA SPACER®
- ULTRA SPACER SURFACE HOLE®

**DRILXPRESS® ships throughout
North America and internationally.**
