Ultra Seal® Plus

Ultra Seal® Plus is a blend of Ultra Seal® XP, Ultra Seal® C and additional sealing agents, Ultra Seal® Plus' large particle array establishes a stronger initial bridge across the thief zone. The inclusion of these larger particles results in effective control of rigid type fractures, vugular or unconsolidated formations possible.

BENEFITS

- Broad particle size loss circulation blend of fibrous, granular and flake materials designed for massive loss circulation and heavy seepage
- Designed for whole mud loss

CONCENTRATIONS

Lost Circulation: A 50-200 barrel pill of 40-60 lbs/bbl; **Ultra Seal® Plus** should be mixed and spotted as a sweep or a spot across the loss zone.
